COMPOSITE

Hijauan: 70.0 / 100

Pentamont: 74.7 / 100

Winner: PENTAMONT

Both freehold, large-format Mont Kiara. Pentamont wins on yield, newness, liquidity and parking; Hijauan wins on price-per-sq-ft and low-density exclusivity. Hijauan transacted data is THIN (2 deals) — treat its value case as indicative.

COMPOSITE SCORE	70.0 / 100	74.7 / 100	PENTAMONT

Category Analysis

1. Price & Value - Winner: Hijauan Kiara

Hijauan transacts at RM 732 psf vs Pentamont's RM 831 (~12% cheaper) with larger minimum built-ups (2,090 sq ft floor). Caveat: Hijauan's median rests on ONLY 2 transactions (May-Oct 2025) - directional, not robust. Pentamont's 32-deal median is far more reliable.

2. Property Specs - Winner: Trinity Pentamont

Pentamont is ~13-14 years newer (2021 vs 2008), with a standout ~4-bay/unit parking ratio and a wider layout range. Hijauan counters with real exclusivity - private lift lobby per unit, max 2 units/floor, and one of Mont Kiara's lowest densities (35 units/acre).

3. Rental Income - Winner: Trinity Pentamont

Pentamont's ~6.0-6.4% gross yield is strong for MK luxury; Hijauan sits ~5%. Newer fit-out and resort facilities command RM 8-10k/mo on 2,000+ sq ft vs RM 6-7k at Hijauan. Both draw the same deep expat pool (GIS/MKIS families, Japanese/Korean/European, China mainland).

4. Neighbourhood - Winner: Trinity Pentamont (slight)

Both core Mont Kiara: international schools, malls (1MK, Publika, Plaza MK), hospitals, SPRINT/NKVE/Penchala Link. Neither has walkable rail. Hijauan's adjacency to the SPRINT elevated highway (noise) and TNB high-tension lines (a perception turn-off) tips it slightly to Pentamont.

5. Investment Potential - Winner: Trinity Pentamont

Higher yield, newer asset (lower near-term CapEx), and critically - liquidity: 32 transactions/yr vs 2. Easier to exit at a defensible price. Hijauan's renovate value-add angle exists but is offset by thin transaction depth and an 18-year-old building.

6. Cost of Ownership - Winner: Trinity Pentamont

Maintenance is close (RM 0.41 vs 0.45 psf/mo), but Pentamont's newer M&E; means lower repair/sinking-fund risk. Hijauan's 18-year-old lifts, HVAC and water systems warrant a sinking-fund balance check before any offer.

7. Market Position - Winner: Trinity Pentamont

Both buyer's markets. Pentamont's ~140 active for-sale listings signal liquidity and negotiation room; Hijauan's near-zero transaction volume signals thin demand - harder to price and to exit.

8. Risk Factors - Winner: Trinity Pentamont

Hijauan carries: SPRINT noise, TNB high-tension-wire perception, thin liquidity, older building. Pentamont's main risks are a higher absolute entry (RM 1.7M+) and large-unit oversupply competition - but it's newer, liquid, and 95% taken up.

Pros & Cons

	Hijauan Kiara	Trinity Pentamont
PROS	- Cheapest psf (RM 732 transacted) - Very low density / exclusivity - Private lift lobby per unit - Large family layouts (2,090 sq ft floor) - Spa Island facilities	- Strong ~6% gross yield - Newer (2021-22) - Exceptional parking (~4 bays/unit) - Liquid (32 deals/yr) - Resort facilities, 95% taken up
CONS	- 18 years old (M&E/CapEx risk) - SPRINT highway noise - TNB high-tension lines nearby - Very thin transaction volume - Higher maintenance psf	- Higher psf (RM 831) - High absolute entry (RM 1.7M+) - Large units = shallower buyer pool - Oversupply competition - Polarising theme facilities

Recommendation

Goal	Best Pick	Why
Yield / rental investor	Pentamont *	~6% gross vs ~5%, newer, liquid
Capital appreciation	Pentamont	Newer stock, defensible resale, 32-deal liquidity
Cheapest entry per sq ft	Hijauan	RM 732 vs 831 psf transacted
Low-density / privacy / own-stay	Hijauan	35 units/acre, private lift lobby, big layouts
Renovate value-add	Hijauan	Older stock, deeper psf discount
Lowest risk / easiest exit	Pentamont	Liquid, newer, no highway/TNB drag

The Catch (winner): Pentamont's large units mean a high absolute ticket (RM 1.7M+) and a shallower buyer/tenant pool - factor longer letting-up time and price on transacted RM 831 psf, not asking. Verify the sinking-fund split within the maintenance rate.

Next Steps

1. Confirm Hijauan Kiara transacted comps beyond the 2 recent deals - the value case hinges on real liquidity.
2. Pentamont: verify current live listing count + latest transacted psf on-portal before quoting a client.
3. For either - request MC management + sinking-fund account balance (essential for the 18-yr-old Hijauan).
4. Run /realestate analyze Trinity Pentamont Mont Kiara for a full sub-scored deep-dive.
5. Foreign buyer: both clear the RM 1M KL minimum; model 70% MOF, 4-8% stamp-duty surcharge, RPGT 30% Yr1-5 / 10% Yr6+.
