

PROPERTY COMPARISON

Three-Way Head-to-Head — Mont Kiara Luxury Condos
8 June 2026

	Mont Kiara Damai	Hijauan Kiara	Mont Kiara Aman
Composite	65.0	72.2	72.7
Tenure	Freehold	Freehold	Freehold
Completed	2004	2008	2005
Density	6/floor	Lowest (<=2/fl)	High (2 towers)
Entry	~RM 2.0m+	RM 1.55-2.8m	from RM 1.48m
Median psf	RM 677	~RM 690-750	RM 674

WINNER: Mont Kiara Aman (72.7) — narrowly, on yield, liquidity and lowest carry. **Hijauan Kiara (72.2)** is effectively tied and wins on exclusivity & risk. **Damai (65.0)** trails but offers the deepest renovate-and-resell value-add.

All three are **freehold, Sunrise-built condos in the Mont Kiara core** — so neighbourhood is a tie and the contest is decided on price/value, density, unit size, yield and liquidity.

For educational/research purposes only. Not financial or investment advice. AI-generated estimates; Hijauan median psf partly estimated (thin volume). Verify on PropertyGuru/iProperty/EdgeProp/brickz before acting.

Typical rent	RM 5.5-9k	RM 6-7k	RM 5-7k

Read: Hijauan = newest + most exclusive (lowest density). Aman = cheapest entry + best yield/liquidity (smallest units). Damai = biggest units + deepest psf discount, but oldest and least liquid.

Category Detail

1. Price & Value — Hijauan

Hijauan has the lowest psf band (RM 603-786) AND the lowest density — most value-for-product. Aman is the cheapest absolute entry (from RM 1.48m). Damai transacts at RM 677 psf but huge units inflate absolute price; weak at the top of its asking.

2. Specs — Hijauan

Hijauan: newest (2008), garden low-rise, <=2 units/floor (best privacy). Damai: biggest units in MK (to 11,000 sf) but oldest (2004). Aman: smallest units in denser towers.

3. Rental Income — Aman

Aman: smaller units + low entry = best gross yield (~4-5%) and deepest tenant pool. Hijauan ~4-4.5% on a low-psf entry. Damai weakest (~2.6-4.3%) — large built-ups depress rent-per-psf; appreciation-led.

4. Neighbourhood — Tie (84)

All in the MK core: GIS/MKIS international schools, 1MK / Plaza MK / Solaris, SPRINT access. No walkable MRT/LRT for any (car-dependent). Genuinely tied.

5. Investment Potential — Aman

Aman: best yield + liquidity, freehold, RPGT-free after Yr5. Hijauan: strongest capital-preservation (scarcity, 188 low-density units). Damai: best value-add (oldest, biggest discount) but thin large-unit resale.

6. Cost of Ownership — Aman

Maintenance psf is similar, so absolute carry tracks unit size. Aman (smallest) = lowest carry; Damai (largest) = highest.

7. Market Position — Aman

Aman's smaller, cheaper units transact most often = best liquidity. Damai (big units) and Hijauan (only 188 units) are thinner. All freehold; broad KL high-rise overhang applies.

8. Risk — Hijauan

Hijauan: newest + lowest density + freehold = lowest risk (small resale pool the only knock). Aman: denser = internal resale competition. Damai: oldest = higher CapEx/sinking-fund and liquidity risk.

Pros & Cons

Mont Kiara Damai

Pros: Biggest units in MK; lowest transacted psf (RM 677); Sunrise pedigree; strong renovate-and-resell value-add.

Cons: Oldest (2004) = CapEx/sinking-fund risk; large units = poor liquidity & thin yield; negative leveraged cash flow.

Hijauan Kiara

Pros: Newest (2008); lowest density in MK (188 units); lowest psf band; freehold; lowest risk; superb own-stay.

Cons: Small project = thin resale/rental volume; modest yield; larger layouts cost more in absolute RM.

Mont Kiara Aman

Pros: Lowest entry (from RM 1.48m); best yield + liquidity; lowest carry; deep expat tenant pool for 2-3 bed.

Cons: Densest of the three (345 units) = less exclusivity + internal resale competition; 2005 stock may need refresh.

Recommendation

OVERALL WINNER: MONT KIARA AMAN (72.7) — narrowly over Hijauan Kiara (72.2)

Best for Cash Flow / Yield	Mont Kiara Aman — smaller units + low entry = best gross yield, easiest to let.
Best for Capital Appreciation	Hijauan Kiara — scarcity & ultra-low density preserve value.
Best for Own-Stay / First Luxury Home	Hijauan (lifestyle) or Aman (budget entry from RM 1.48m).
Best for Renovate-and-Resell	Mont Kiara Damai — oldest, deepest psf discount, large units (mind RPGT before Yr6).
The Catch (winner Aman)	Densest of the three — trades exclusivity for liquidity; you compete with other owners on resale. If prestige > yield, buy Hijauan.

For educational/research purposes only. Not financial or investment advice. AI-generated estimates; Hijauan median psf partly estimated (thin volume). Verify on PropertyGuru/iProperty/EdgeProp/brickz before acting.
