

PROPERTY COMPARISON

Astrea (Mont Kiara core) vs Alix Residences (Segambut / North Kiara)

COMPOSITE

Astrea: 74.4 / 100

Alix: 65.5 / 100

Winner: ASTREA

CROSS-SUBMARKET: Astrea is Mont Kiara core; Alix is the Segambut / North Kiara fringe (~RM 700 psf belt). The psf gap is largely a **LOCATION** gap, not a bargain. Alix transacted data is very thin (new project) - pricing is indicative only.

COMPOSITE SCORE	74.4 / 100	65.5 / 100	ASTREA

Category Analysis

1. Price & Value - Winner: Alix (slight)

Alix's ~RM 700 psf vs Astrea's RM 874 buys more space (up to 2,476 sq ft, 4+1) for the money, both freehold. But the ~20% discount reflects Segambut's fringe status, not underpricing - within its own belt (~RM 650-750) Alix is FAIR, not cheap. Astrea's transacted RM 874 sits just below its asking cluster = mild buyer leverage in MK core.

2. Property Specs - Winner: Alix

Alix has bigger family layouts (4BR standard, up to 2,476 sq ft), more parking (2-4 bays), rich facilities (sky futsal, tennis, sky pool, theatre). Astrea is newer-feeling UEM Sunrise quality with dual sky decks (8F + 36F) but smaller 3BR units and ~2 bays.

3. Rental Income - Winner: Astrea

Decisive. Astrea yields ~5.5-6.0% gross (RM 6,500-8,000/mo) - above the MK average - vs Alix's ~3.8% (big units + fringe location drag rent). Astrea's MK-core expat tenant demand (GIS/MKIS families) is far deeper than Segambut's.

4. Neighbourhood - Winner: Astrea

Mont Kiara core (international schools, 1MK/Publika/Plaza MK, hospitals, established expat hub) clearly outranks the Segambut/North Kiara fringe, which carries flood-exposure history near the river, chronic traffic, and transit years out (MRT3 ~2032). Neither has walkable rail today.

5. Investment Potential - Winner: Astrea

Higher yield, better resale liquidity (13 transactions vs ~1), stronger appreciation support from a prime address. Alix's angle is a cheaper freehold entry with big units, but thin price discovery, area oversupply and flood/transit risk weaken the case.

6. Cost of Ownership - Winner: Astrea (slight)

Maintenance is close (RM 0.35 vs 0.38 psf/mo); both new = low near-term CapEx. Astrea's smaller units mean a lower absolute monthly carry.

7. Market Position - Winner: Astrea

Both buyer's markets. Astrea has real liquidity and demand; Alix offers more negotiation room (wide RM 631-939 psf asking spread = motivated sellers) but signals softer absorption and harder exit.

8. Risk Factors - Winner: Astrea

Alix carries more: Segambut flood exposure, thin transaction history (exit-liquidity risk), area oversupply, transit years away, condo-vs-SR title to verify. Astrea's main risks are MK high-rise oversupply and its own thin resale sample. Lower overall risk on Astrea.

Pros & Cons

	Astrea (Mont Kiara)	Alix (Segambut)
PROS	- Freehold in MK core - Above-market yield (~5.5-6%) - New (2023), UEM Sunrise quality - Low density (240 units) - Deep expat tenant pool	- Cheapest entry (~RM 700 psf) - Freehold - Big 4BR family layouts + parking - Rich facilities - TA Global pedigree
CONS	- Higher psf (RM 874) - Smaller 3BR units - Thin resale liquidity (13 deals) - MK oversupply caps appreciation - Title condo-vs-SR to confirm	- Fringe Segambut address - Low yield (~3.8%) - Flood-prone area history - Very thin transaction data - Transit years out; oversupply belt

Recommendation

Goal	Best Pick	Why
Overall winner	Astrea *	74.4 vs 65.5 - wins 6 of 8 categories
Cash flow / yield	Astrea	~5.5-6% vs ~3.8%
Capital appreciation	Astrea	Prime address, resale liquidity
Own-stay / big family space	Alix	4+1, up to 2,476 sq ft, more parking, for less
Value-entry / lowest ticket	Alix	~RM 700 psf freehold near MK
Lowest risk / easiest exit	Astrea	Liquid, prime, no flood/transit drag

The Catch (Astrea): you pay a MK-core premium (RM 874 psf) into an oversupplied high-rise market that caps appreciation - the return case leans on yield + rentability, not price growth. Confirm title type (condo vs serviced residence) before committing.

Next Steps

1. Verify title type on both (condo vs serviced residence) - affects utility tariff, quit rent, and MOF.
2. Alix: check exact block flood elevation (Segambut river proximity) and pull agency co-broke transacted data - brickz is too thin.
3. Astrea: request MC sinking-fund balance; confirm current maintenance rate + parking bays.
4. Foreign buyer: both clear the RM 1M KL minimum; model 70% MOF, 4-8% stamp-duty surcharge, RPGT 30% Yr1-5 / 10% Yr6+.
5. Run /realestate analyze Residensi Astrea Mont Kiara for a full sub-scored deep-dive.

DISCLAIMER: Educational/research only. Not financial, investment, or legal advice. Cross-submarket comparison (MK core vs Segambut fringe) - the psf gap is largely locational. Alix transacted data is very thin (new project); treat pricing as indicative. AI-generated estimates.
