

BUILDING DUE-DILIGENCE NOTES

Unit B-18-01, Hijauan Kiara (Block B) · Prepared for Dr. Ingo Schoningh · Spencer Leong, Kommons Realty (REN 72821)

Ahead of signing, I reviewed the Management Corporation's last three AGM minutes (14th to 16th, most recent 26 April 2025) so you have a clear picture of the building itself, not only the unit. Managing agent: Henry Butcher Malaysia (Mont Kiara). This is an honest summary.

MANAGEMENT & FINANCES

As at the last audited accounts (FY ended June 2024), the operating fund runs a small deficit (around RM38k to RM72k a year), driven by the minimum-wage rise and TNB tariff increase, and is comfortably covered by an accumulated surplus of about RM500k. The sinking fund stands at roughly RM1.1 to 1.2 million after planned projects. Stable and solvent, with modest margins.

SPECIAL ASSESSMENT

No special assessment has been levied.

The Chairman noted a future increase in the sinking-fund contribution may be needed to fund upcoming major works, so the sinking-fund charge could rise. Nothing is fixed yet.

BUILDING CONDITION & WATER/PIPEWORK (Block B, your block)

Block B has documented water-ingress items, and a building-wide pipe replacement is planned.

For Block B specifically: roof leakages affecting the penthouse (top-floor) units, with rooftop and water-tank waterproofing works approved; and an ageing roof gutter, with RM100k budgeted to replace it. Common areas and the car park have also had leak repairs building-wide (main dropper, drainage, a pipe burst). For accuracy: the roof leak affects the top/penthouse units, and B-18-01 (floor 18) sits below that level, so it is not directly under the roof, but it is the same block. This is exactly why the inspection clause we included matters.

LIFTS

A building-wide Lift Modernisation Programme is scheduled for 2028 (Toshiba lifts); a lift-speed upgrade is under evaluation and would be considered under that programme.

EV CHARGING

No shared EV charging stations are approved yet.

15 owners have private chargers at their own bays, but further private installations are on hold due to the building's electrical capacity. A proposal for shared EV charging stations was tabled at the 2025 AGM but did not pass (it fell short of the 75% threshold), though a by-law allowing EV bays was adopted. I will confirm the current position with the management office.

RENOVATION (relevant to your 2027 plans)

The AGM adopted renovation guidelines for duplex-unit balconies. Any duplex balcony or structural renovation now requires Management Committee approval and DBKL consent, with costs borne by the owner. Worth factoring into your renovation timeline.

My aim is simply that you go in with eyes fully open. Happy to talk any of this through. Spencer Leong, Kommons Realty Sdn Bhd.
Figures and items summarised from the HKMC AGM minutes (14th to 16th); to be read together with the management office's written confirmations.
